Portfolio: <https://sivabalan-portfolio-9lv4.onrender.com> | LinkedIn: www.linkedin.com/in/sivabalan-dev

GitHub: <https://github.com/Sivabalan-tech>

Profile Summary

Software Developer specializing in Full Stack and AI-powered application development using Python, Java, SQL, JavaScript, FastAPI, and Generative AI technologies. Experienced in building scalable backend systems, REST APIs, responsive web applications, and intelligent software solutions using machine learning and RAG architectures.

Internship Experience

Data Science and Analytics Intern | Future Interns | Remote

Jul 2025 – Aug 2025

- Designed interactive business intelligence dashboards using Power BI and Google Looker Studio to analyze e-commerce sales performance and customer behavior.
- Visualized key metrics including revenue trends, customer insights, and business KPIs to support data-driven decision-making.
- Automated reporting workflows to improve sales trend analysis efficiency and enable faster identification of high-performing products and market patterns.

Artificial Intelligence & Machine Learning Intern | Edunet Foundation (AICTE | IBM SkillsBuild)

Jan 2026 – Feb 2026

- Completed a 6-week AI & Machine Learning internship involving project-based learning, mentor-led technical sessions, and real-world AI implementation tasks.
- Applied machine learning and data analysis concepts to develop AI-driven solutions using Python and analytical modeling techniques.
- Completed 80+ hours of technical training through IBM SkillsBuild covering AI, machine learning, and emerging technologies.
- Presented project outcomes and collaborated in technical review sessions to improve solution design and implementation strategies.

Projects

NeuraPulse AI – Intelligent Healthcare Assistant

Tech Stack: Python, RESTful API, Gemini API, FAISS, NLP, Machine Learning

- Developed an AI-powered healthcare assistant using Retrieval-Augmented Generation (RAG) with FAISS vector storage and Google Gemini for medically grounded responses.
- Built a wellness forecasting engine using Weighted Moving Average (WMA) algorithms to analyze user health patterns including sleep, mood, and energy tracking.
- Integrated Gemini Vision for medical image analysis to evaluate dermatological symptoms from uploaded images.
- Designed backend workflows for secure health-query processing and contextual AI response generation.
- Processed and analyzed 500+ health log entries including sleep, mood, and energy patterns using WMA-based wellness forecasting.

Study Buddy – AI-Powered Learning Platform

Tech Stack: FastAPI, JavaScript, Tailwind CSS, JWT, Python, SQL

- Built a full-stack study management platform with JWT authentication, quiz modules, coding practice, and AI-based communication feedback.
- Implemented real-time progress tracking and analytics to monitor learning behavior and study efficiency.
- Integrated FastAPI backend services with audio recording and AI-assisted evaluation features.
- Developed analytics features to monitor user performance across multiple study modules and coding practice sessions.

Technical Skills

Languages: Python, Java, SQL

Web: HTML5, CSS3, JavaScript, Tailwind CSS, FastAPI, REST APIs, JWT Authentication

AI & Data: Generative AI, NLP, RAG, FAISS, Deep Learning

Tools: MySQL, Git/GitHub, Power BI, Excel, Google Collab

Core Concepts: OOP, Data Structures, API Integration, Database Management

Education

MCA – Generative AI | SRM Institute of Science and Technology, Tamil Nadu

Jun 2024 – May 2026 | CGPA: 9.57

Bachelor of Science in Computer Science (B.Sc. CS) | Sri Ramakrishna Mission Vidyalaya, Tamil Nadu

Jun 2021 – May 2024 | CGPA: 7.49

Certifications & Achievements

- Google AI/ML Virtual Internship and Google Android Developer Virtual Internship – AICTE
- Python Full Stack Developer Virtual Internship – Eduskills
- Power BI Workshop – Data Visualization & Dashboard Development
- IoT Workshop – IoT Applications, Sensor Integration & Device Connectivity
